# DIET FOR PATIENTS WITH TYPE 2 DIABETES

## FOOD GROUPS

Using the exchange groups lets you add variety to your meals and adapt the diet to your needs.

It is important to follow the serving size for each of the food groups.

The weights listed refer to foods that have already been prepared and are ready to eat. In some cases, the uncooked (raw) weight is also indicated.

Each serving of carbohydrates or proteins is equivalent to 10 grams of the nutrient.

We recommend that you follow the serving sizes assigned for each food group (vegetables, starches, fruits, dairy and protein), however, it is possible to exchange servings between food groups within the same meal.

### STARCH (GRAINS AND GRAIN PRODUCTS, LEGUMES AND TUBERS)

- = 40 g of rice (12 g uncooked)
- = 15 g of melba toast (2 pieces) or other toast
- = 50 g of sweet potatoes
